NEW ENGLAND Caravan Park

New England Caravan Park is beautifully set in the Lancashire countryside a short trip from the lake District, coast and Yorkshire Dales near the town of Carnforth. It is situated on the banks of the Lancaster - Kendal canal.

The site was originally a limestone quarry, quarried by the old Wigan Coal and Iron Company from 1793 to 1913. Several relics and old weapons have been found dating back to the Jacobean Wars. The site extends to over 20 acres and having been left to return to its natural state for many years prior to opening, is covered by dense foliage which obscures the quarry workings and add to the character of the visible limestone. New England is a great place to own your holiday home away from home.

All of the caravan pitches are spacious and allow sufficient area for gardens, lawns and private parking. There are mains water, drainage and electrical services to all vans.

The Lancaster Canal runs alongside the park, pleasant walks along the towpath add a relaxing element to any day.

Our policy of setting no time limits on van ownership allows a wide diversity of caravans and owners.

The outdoor heated swimming / paddling pool a great place to relax and have fun.

Amenities:

- Shop
